Revenue vs Net Profit (10yr)

ROE vs ROCE (10yr)

IOC

Pros

- Net profit compounding at above 20% over 5 years creates significant shareholder value
- Very high interest coverage ratio reflects negligible financial stress from debt servicing
- Earnings per share growing above 15% CAGR indicates strong earnings quality and compounding
- Revenue growing slower than profits shows improving operating leverage and scale benefits

Cons

- Free cash flow conversion below 100% of operating profit means some reported profit is not yet converting to cash

Capital Allocation Pattern: Shareholder Returns
